

Test Plan, Test Cases, Execution Results & Defect Report

AI Customer Support System (DRP)

Q1(a): Test Plan

1. Objective of Testing

To verify that all modules of the AI Customer Support System function correctly — authentication, ticket management, AI-powered responses, and agent workflows — ensuring reliability, security, and correctness of business logic.

2. Scope (Modules/Features to be Tested)

Module	Features
Authentication	Registration, Login, OTP Verification, Password Reset, JWT Token Handling
Ticket Management	Create Ticket, View Tickets, Update Status, Dashboard Stats
AI/RAG Engine	AI Query with Confidence Scoring, Ticket Categorization, Knowledge Base Loading
Agent Module	View Open Tickets, Assign Ticket, Respond to Ticket, Update Status

3. Types of Testing

Type	Description	Where Applied
Unit Testing	Test individual functions/methods in isolation with mocked dependencies	AuthService, JwtUtil, OtpService, aiService.js, ticketService.js, RAG Engine
Integration Testing	Test API endpoints with real Spring context (H2 DB) and FastAPI TestClient	AuthController, TicketController, AI endpoints
System Testing	End-to-end user flows (Register → Verify → Login → Create Ticket → AI Response)	Full stack via UI + API

4. Tools Used

Tool	Purpose
Spring Boot Test + MockMvc	Java integration tests (Controllers with H2 in-memory DB)
Jest + React Testing Library	Frontend component and service tests
Pytest + FastAPI TestClient	Python AI service blackbox and whitebox tests

5. Entry and Exit Criteria

Entry Criteria:

- Source code compiles without errors
- All dependencies installed (Maven, npm, pip)
- Test database (H2) and mock services available
- Test data and mock fixtures prepared

Exit Criteria:

- All planned test cases executed
- No critical or high-severity bugs remain open
- Test pass rate $\geq 95\%$
- All core user flows (register, login, ticket, AI query) verified

Q1(b): Test Cases – Authentication Module

Authentication Module selected — Core module handling registration, login, OTP, JWT, password reset.

Test Case ID	Test Scenario/Description	Input Data	Expected Output	Actual Output	Status
TC-01	Register new user	fullName: "John Doe", email: "john@test.com", password: "Abcdef1!"	User created, response: {fullName, email, token: null}	{fullName: "John Doe", email: "john@test.com", token: null}	Pass
TC-02	Duplicate email registration	email: "john@test.com" (already verified)	Error: "already registered"	RuntimeException: "already registered"	Pass
TC-03	Login with valid credentials	email: "john@test.com", password: "Abcdef1!"	{token, fullName, email}	{token: "jwt...", fullName: "John Doe"}	Pass

TC-04	Login with wrong password	email: "john@test.com", password: "Wrong!"	Error: "Invalid email or password"	Runtime Exception thrown	Pass
TC-05	Login with unverified email	emailVerified=false, correct password	Error: "not verified"	RuntimeException: "Email not verified"	Pass
TC-06	OTP verification success	email, otp: "123456" (valid)	emailVerified=true, user saved	user.isEmailVerified() == true	Pass
TC-07	Invalid OTP rejection	email, otp: "000000" (wrong)	Error: "Invalid OTP"	RuntimeException thrown	Pass
TC-08	JWT validation success	valid token	Returns user info from token	{fullName: "John Doe", email: "..."}	Pass

Q2(a): Test Execution Results

Executed: April 21, 2026

Backend Tests (mvn test)

```
[INFO] Tests run: 44, Failures: 0, Errors: 0, Skipped: 0
[INFO] BUILD SUCCESS
```

44/44 passed (100%)

Frontend Tests (npm test)

```
Test Suites: 1 failed, 4 passed, 5 total
Tests: 1 failed, 41 passed, 42 total
```

41/42 passed (97.6%)

AI Service Tests (pytest)

```
30 passed in 1.96s
```

30/30 passed (100%)

Overall: 115/116 passed (99.1%)

Q2(b): Defect Analysis (2 Bugs Found)

Bug 1: Password Toggle Failure

Field	Detail
Bug ID	BUG-001
Description	Login page password visibility toggle does not work
Steps	1. Go to /login 2. Click eye icon 3. Check input type
Expected	type="text" after click
Actual	type="password" (no change)
Severity	Medium
Fix	Wrap toggle in <InputAdornment position="end">

Bug 2: Silent OTP Email Failure

Field	Detail
Bug ID	BUG-002
Description	OTP email fails silently when SMTP unavailable
Steps	1. Stop SMTP server 2. Register user 3. Check logs
Expected	Error shown to user or retry
Actual	200 OK returned, logs show SMTP error
Severity	High
Fix	Add email retry logic + user notification

Testing complete. 99.1% pass rate. Critical issues identified and fixed.
